

Efflorescence Remover

Efflorescence Remover is a liquid cleaner intended to remove efflorescence, mortar smears, grout haze, hard water deposits, atmospheric staining and other blemishes on the surface of masonry.

Features and Benefits

- Biodegradable
- Short dwell time
- Brush, roll or spray apply
- Rinses off with water
- Safe on glass

Application Procedures

Test Area

Always prepare a test area prior to full application. This will indicate the time required for project completion and suitability of product for effective cleaning of the substrate. Additionally, specific job site consumption rates can be calculated after the test area is completed.

Equipment and Tools

This product is designed to be applied by brush or roller. Other equipment required: masking tape, nylon brush, plastic (polyethylene) sheet, should be used for protecting surfaces not to be treated with Efflorescence Remover.

Preparation

Masking

Cover / protect areas where cleaning is not desired, including adjoining surfaces where over spray may travel. Plastic (polyethylene) sheets make a very effective barrier. Test to see effects on any glass or metals that may come in contact with Efflorescence Remover. DO NOT DILUTE.

Application

Apply a thick, even layer of Efflorescence Remover onto a DRY substrate. Let sit for several minutes then scrub the surface with a nylon brush. Rinse off the substrate and reapply as needed.

Removal and Cleanup

After allowing the product to dwell, rinse the surface with copious amounts of water (pressure washer). Do not allow run off to dry on other surfaces.

Safety Requirements

Proper safety procedures should be followed at all times while handling this product. Refer to the Safety Data Sheet for important health/safety information before use. Efflorescence Remover should only be used for approved applications.

Limitations

Surface temperatures should be 40° to 95° F (5° to 32° C). The product performs effectively at lower temperatures (even at 40° F, 5° C), but the dwell time increases.

Packaging and Coverage

Approximately 5 gallons. The product is engineered for thick film build up on vertical and overhead surfaces. Minimum wet film thickness should be 0.5mils (500microns). Always test the substrate to ensure accurate coverage rates. Typical coverage rates are between 150 and 200 ft sq. ft. per gallon.

Storage And Shelf Life

This product must be stored at temperatures above freezing and below 78°F -- and at low humidity. DO NOT ALLOW PRODUCT TO FREEZE. Do not store in direct sunlight. The shelf life of an unopened container is 1 year.

After use, fully seal any unused portion in its original container prior to storage. If the product was previously opened or was stored longer than a year, test in an inconspicuous location for effectiveness.

Technical Data

Appearance	White foam gel
Specific Gravity	1
Boiling Point	Not specified
pH	2
VOC content	N/A

Warning

Not for internal consumption. Keep out of reach of children and animals. Consult Material Safety Data Sheet (MSDS) for specific information.
