

Cathedral Stone® Products, Inc.

The leader in scientific masonry restoration

## Workshop Visitor Guide

During the three day Jahn Restoration Training Workshops, we will introduce you to the methods of masonry repair using Jahn Restoration Mortars. Our workshops are all hands on. Work stations are set up using stone and terra cotta cut to simulate a variety of jobsite conditions. Learn to repair limestone, sandstone, terra cotta and brick. The techniques we teach differ from what most experienced masons already know. The objective of these workshops is to teach the proper skills to produce the best possible finished product for your masonry projects.

Some of you come to the workshop with knowledge of masonry-work and restoration methods, others with limited experience. Whatever their background, each person will start at the same level and will be encouraged to progress at their own pace.
